

DemoLinux

DemoLinux provides a version of Linux that you can use without installation on your hard disk (or even without an hard disk); nevertheless, should DemoLinux fail to function, this does not mean that you cannot install Linux on your machine. The included version of DemoLinux is based on the Linux Mandrake distribution.

Hardware requirements: to run DemoLinux, you need at least a Pentium processor (or compatible), a fast CD-Rom (24x), a VESA 2.0 compatible video card and 32 Mb of Ram (64 recommended).

The simplest way to run DemoLinux is to boot from the CD and follow the instructions therein, but please read the documentation available on the CD in the index.html file for more information and Copyright. If you use Microsoft Windows™ to read this CD, the documentation page should open up automatically; if that is not the case, right-click on the CD icon and choose «Open».

Warning: This CD works on a great variety of recent computers, but we cannot guarantee that it will work on yours. This CD is provided AS IS, with no warranty, either expressed or implied, and the editor assumes no responsibility for any possible malfunction of, or damages produce by, the included software. All the trademarks and Copyrights are the exclusive properties of their respective owners.

.....
DemoLinux vous offre une version de Linux utilisable sans installation sur le disque dur (ou même sans disque dur); cependant, un échec de cette version d'essai ne signifie pas que Linux ne peut pas être installé sur votre ordinateur. Cette version de DemoLinux est basée sur la distribution Linux Mandrake.

Configuration requise : processeur Pentium (ou compatible), lecteur CD-Rom rapide (24x), 32 Mb de Ram (64 conseillé), une carte graphique VESA 2.0.

La procédure la plus simple pour utiliser DemoLinux est de démarrer l'ordinateur à partir du CD-Rom et choisir une des résolutions supportées (1024x768, 800x600 ou 640x480), mais lisez la documentation disponible sur le CD dans le fichier index.html pour plus d'information et le Copyright. Si vous utilisez Microsoft Windows™ pour lire ce CD, la documentation devrait s'ouvrir automatiquement; si ce n'est pas le cas, cliquez sur l'icône du CD avec le bouton droit et sélectionnez «Ouvrir».

Attention : Ce CD fonctionne sur une grande variété d'ordinateurs récents, mais on ne garantit pas que ça marche sur le votre. Ce CD-Rom est offert sans garantie. La responsabilité de l'éditeur ne peut être engagée pour les dysfonctionnements éventuels de certains programmes ou des quelconques dommages qu'ils pourraient engendrer.

Toutes les marques et copyright sont les propriétés exclusives de leur propriétaires respectifs.
